

-
- The diagram illustrates a search tree for a 3x3 grid puzzle. The root node is at the top, and the tree branches out into multiple levels of child nodes. The nodes are represented by black dots, and the edges are represented by blue lines. The tree structure is complex, with many branches and sub-branches, indicating a large search space. The nodes are arranged in a way that shows the progression of the search from the root to the leaf nodes.
